

GRASSES

BROME GRASS Special Value B-5

A Combination of 75% Lincoln Type and 25% Canadian

This combines the faster growing heavier producing southern strain with its aggressive habits with some of the Canadian which is not quite as fast growing, much more durable and has a better root system. A leafy Clover that may be sown with it as fast as the straight Lincoln type would do. We had two lots of seed showing about the same 85% purity and 70% germination, that's just a little below top quality but very serviceable seed. These large seeded grasses do not germinate as high as Clovers or Alfalfa, but Gro-Coated this seed should give good results. It gives you a lot of splendid value at very substantial savings in price. See Special Value B-5 on price list.

Straight Lincoln or Straight Canadian

We can also supply you with the regular Lincoln strain Brome. See Item 137 on price list, and the Canadian item 136. All of these are Gro-Coated Brand Seed.

Reed Canary Grass

A remarkable grass that grows on extremely wet land and is still very drought resistant after established. A leafy grass, grows as much as 5 to 6 feet high. Should give you two cuttings in a season. Stands can be maintained for a long time yet easily eradicated. Starts growing early in the spring year round until late in the fall. A seed crop can sometimes be obtained in the same year. Ask for a circular on Reed Canary Grass. Item No. 141 on price list.

RYE GRASSES

Domestic

If you want a grass to sow early and give you a good green growth quick, this grass will do it. It is a nice grass produces a turf quickly. It's fine to use in lawn mixtures or in pasture or other seedings where you want a grass that will cover the ground in a short time. It's not permanent but it grows fast. Item No. 128.

Perennial

Perennial Rye Grass is somewhat like Domestic Rye Grass. Perennials don't grow quite so fast but usually lasts longer. It also has the advantage of giving you a quick green and good production in a short time. See Item No. 129.

TIMOTHY

You are all familiar with Timothy. The seed is available in many places. Our tests in the Gro-Coated brand seeds however have indicated much better stands are normally obtained, and our customers report faster growth and better drought resistance. For use in mixtures it is a very valuable grass. We generally carry this in two grades in our store; the World Brand Grade, Item No. 79, and the Fancy Grade, number 78. The World is the best you get, but the Fancy is also nice quality.

Orchard Grass

Every year we are selling more and more orchard grass. It will tolerate more heat and more drought than Timothy or Brome. Grows on a wide variety of soils and is one of the first grasses to start growing in the spring. Give you a good production of leafy pasture. It's a bunch grass and combines well with Clovers and grasses or very heavy production. Let us tell you more about this great grass to use in combination with your Clovers, Legumes, and grasses in small places. Item No. 142 on the price list.

BERRY'S SPRING OPENING SALE PRICES

MARCH 1, 1956 PRICE LIST

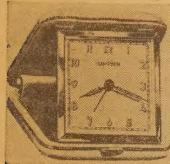

These prices are freight prepaid or orders for 200 pounds or more in Illinois, Indiana, Missouri, Wisconsin, Minnesota, Michigan, Kansas, Nebraska, Kentucky and Western parts of New York, Pennsylvania, West Virginia, and Maryland. In any other area or if your order is less than 200 pounds we give you a flat freight allowance of 1¢ per lb., or \$1.00 per 100 lbs. Prices at our store are lower. We sell in smaller quantities and charge less for shipping and Soysbeans, where they have lower prices. Be sure to include insurance for all legume seeds.

Prices listed are guaranteed for the balance of the season through May. Don't delay...Order now. We ship immediately. No orders delayed if payment is prompt.

BRING FESTIVAL COLORS TO YOUR HOME AND GARDEN . . . PLANT AN ASSORTMENT OF FAMOUS GRO-COATED FLOWER SEEDS!

"It costs so little and means so much to add charm and color to your home and its surrounding grounds. Especially is it economical when you use Berry's famous Gro-Coated seeds. They are harder and more vigorous and make more healthy, strong plants. Never before have we been able to offer

such a broad choice. Many of these have been All America Selections. You can choose from old standbys, from new varieties or from a Choice Selected Mixture of each. These prices guaranteed only while present quantities last. All varieties packed in illustrated packets

SWEET PEAS

1326—SWT. PEAS, (A) LITTLE SWEETHEART. Plant grows upright 8" high. A full color range mixture. Suitable for hanging basket.

1327—SWT. PEAS, (A) (HYBRID). (A) Bright red, golden throat. All America Selection. Pkt. 10c.

1321—SINGLE MIXED, (A) All colors. Pkt. 10c.

1390—CALIFORNIA GIANTS MIXED, (A) All colors mixed. Pkt. 10c.

1402—PEPPERMINT STICK, (A) Striped flowers. Pkt. 15c.

Our lawn seed is a scientifically blended mixture of grasses put together to produce a thick turf, long-lived that will retain a sparkling emerald color from early spring until late fall. The seeds in it consist of Kentucky Blue Grass, Red Top, and small amounts of Ryegrass, and the creeping type of fescue. There is nothing that will enhance the beauty or add to the value of a home more than a well kept lawn. Come and talk to us about your lawn seeding problems and let us help you work out your seeding for both sunny and shady grass. We recommend sowing about 1 pound of our Goo-Coated Lawn Mixture per 200 square feet for a new seeding. To renovate your lawn use about 1 pound to 400 square feet.

VISIT A BERRY STORE

Berry's Store Service

There are a number of Berry Retail Seed Stores in various parts of the nation. Each one is staffed with people that have a lot of "know-how" about crops and allied lines.

These stores are located

| | |
|---|--|
| BOONE, IOWA E. on Highway 30 | DARVILLE, ILLINOIS 2807 North Vermilion Street |
| CLARINDA, IOWA First Garfield St. | MARION, OHIO 420 North Main St. |
| FALLS CITY, NEBRASKA EDEL SEED COMPANY | VAN WERT, OHIO Rt. No. 4 West on Hwy 30 |
| CHICAGO, ILLINOIS 1929 West 43rd St. | WASHINGTON COURT HOUSE, OHIO CCC Hiway, West City Limits |
| GALESBURG, ILLINOIS 1153 Grand Avenue | GREENVILLE, OHIO 107-111 West Main Street |
| KANKAKEE, ILLINOIS Rt. 11, North City Limits | KOKOMO, INDIANA 2607 East Markland Avenue |
| STREATOR, ILLINOIS 904 East Kent Street | |

You will enjoy a visit with them if there is a store near you.

Naturally with stores so wide spread there will be a variation of merchandise. All items listed here are not available in all stores. Many items in practically every instance there will be items very similar. You will also find many things not listed, so be sure to visit your Berry store. Any item on this page not marked with an * can be ordered by mail order from Clarinda at the prices here shown.

KILL INSECTS AND RODENTS

Redi-Mix Warfarin

A ready to use bait scientifically mixed with grain which has proven to be most attractive to rodents and ground to the proper size to induce more feeding. 1 lb., 80¢; 2 lbs., \$1.40; 5 lbs., \$2.25

Spring Value

Items with * are available in stores only.

Add to Your Homes' Attractive Luxuriant Lawn! Select

Berry's Supreme Lawn Seed

This makes a fine smooth lawn. Contains chiefly blue grass, Red Top, Fescues and Rye Grasses. The quicker growing grasses provide a nice green cover while the slower, more permanent grasses are coming on. It is our most popular mixture because it gives satisfaction and a lasting lawn.

1 lb., \$1.15; 3 lbs., \$3.15

5 lbs., \$4.50; 10 lbs., \$8.00

1 Lb.
\$1.25

SHUR-GRO GRASS

Although less expensive than our Supreme Lawns, Shur-Gro will produce a quick cover of green grasses. The mixture contains some White Dutch clover as well as permanent grasses. High in nitrogen and free from weeds.

White Dutch Clover

The small white clover so popular for lawns. May be mixed with any lawn grass you have on hand or sown on an old lawn in the early spring. Drought resistant. Helps soil fertility. One pound sows 1,000 or more square feet.

4 oz., 59¢

1 Lb.
\$1.50

Merion Blue Grass

A new strain of Blue Grass that has extreme resistance to disease. Starts after a few weeks and turns brown. Makes a dense heavy turf. There is a tremendous demand for this grass. Many people are looking for something that will give them a strictly beautiful turf. Sow 1 lb. to sq. feet alone or with one part Creeping Fescue described below. Costs more but worth it.

Postpaid: 1 lb., \$5.00; 3 lbs., \$14.25;
5 lbs., \$23.00; 10 lbs., \$45.00

Use of Proper Fertilizer

Vigoro * A 6-10-4 formula that is popular country over. Will not burn. Ideal for fall and spring application. Pacified in bags. 100 lbs., \$4.85 or 1 ton \$21.95

plant
comes

SPECIAL LAWN GRASS MIXTURES
will Custom-Mix any combination of grasses to specific lawn needs. There is a great variety of mixtures to choose from for every soil or drainage problem.

KEEP OUT CRAB GRASS

DuPont Crab Killer. Kills crab grass and chick weed at any stage of growth. Easy to use spray. Seven and one-half ounce bottle treats up to 1,500 square feet. Price \$1.00.

Ortho Crab Killer. Kills crab grass, water grass, wire grass or tall fescue. Ready to use. Self-applying sifter box top. 20 ounces, 79¢.

Weedone Crab Killer. Kills crab grass and chick weed with no harm to desirable grasses or soil. Non-poisonous. 6½ oz. can treats 1,000 square feet. Price 98¢.

Crag Herbicide-1

This is an entirely new concept of controlling weeds with chemicals. Crag Herbicide-1 kills weed seeds as they sprout. It comes in powder form that dissolves readily in water. In the water solution it is harmless to the foliage of most plants. It does not pose a danger of drifting spray damaging other plants. Once it comes in contact with moist soil it is acted upon by bacteria and changed into a new form that kills seeds as they sprout. Since the change does not take place until it gets in the soil it cannot harm plants sprayed on leaves and stems as recommended dosage. It will control broad leafed and grass weeds for 3 to 6 weeks. Excellent for use in lawns among shrubs, strawberry plants, etc. Recommended by Experiment Stations.

Price 4 oz. package \$1.50

This will treat 3,000 square feet.

FREE

*SOIL TESTING SERVICE! Bring soil testing at BERRY'S. A proper balanced lawn and gardens. Have your the right combination of fertilizers and

Items with * are available in stores only.

PREMIER Peat Moss

A handy size bag or carton for every need. Weatherproof containers that are easy to store and clean to use.

Lawn and Garden Fertilizers

Feed your lawn for quick starting grass that's weeds, trees, ground and flowers. Feed it to flowers, shrubs and trees for the prettiest plants you ever had. No better way for a balanced vegetable garden than to use a specially balanced fertilizer. Handily packaged for every use.

The Finest Nursery Stock That Money Can Buy. Quality That Is Really Superior

Stocked In Many Berry Stores and Available Postpaid from Catalog Service

Mail Order Customers. The items listed below are found in our regular mail order catalog and there are many, many more nursery items in that book. So we ask you to refer to our general catalog and if you have mislaid your copy write us so that we may send you another because these nursery values are really wonderful considering the quality offered.

Retail Store Customers. Our retail stores are rather widely scattered so that all do not handle the same items. You will find many items in the stores that are not listed in this page. On the other hand not all of the items here listed can be found in the stores however, the stores can give you catalog service on them and have shipment made direct to your home.

GEORGEOUS ROSES

Hybrid Tea — Floribunda — Climbers

\$1.00
Each
3 for \$2.70

Grade A are good strong well rooted plants. They are 2 years old. Field grown under irrigation and guaranteed to please you.

\$1.25
each
3 for \$3.45

All of the following varieties are available to those who wish to order by mail. Many are carried in the stores and all are available by catalog service through the stores. In addition the stores carry Certified and Patented roses also.

Tea Roses

5063 Etoile de Hollande (red)
5065 Golden Dawn (yellow rose)
5067 Pink Rain (pink)
5069 President Hoover (pink and gold)

Hardy Climbers

5117 City of York (creamy white)
5118 Doubloons (pink)
5116 New Dawn (pink)
5107 Blaze (scarlet)

Everblooming Climbers

5102 Etoile De Hollande (vivid red)
5103 Tailor Made (yellow)
5106 Mrs. E. P. Thom (canary yellow)
5176 Eutin (double red)

Certified and Patented Roses

Also Available on Order or in Stores.

Shade and Other Trees

Busiman Elm

Highly Resistant to phloem necrosis and Dutch Elm Disease. This is the coming shade tree because of its disease resistance. It should be planted wherever danger of Dutch Elm exists or is anticipated. 3 to 4 foot size \$3.75 each; 4 to 5 foot size \$5.00 each.

European Larch

Fastest Growing Evergreen in America. Excellent lawn tree. Soft feathery, light green foliage. See back cover of Berry's catalog under No. CA20 2 year old 1-1/2 foot \$1.65 each 3 for \$4.75.

Double Flowering Peaches

These are showier than the famous Flowering cherries of Washington but much less costly. Branches are loaded with double flowers resembling roses in the early spring. There are four colors.

C1821 Cardinal (deep red) C1822 Peppermint Stick (red and white)
C1823 Honeydew (pink)
C1823 iceberg (snow white)

3 to 4 ft. tree \$1.50 each - 4 to 5 ft. \$2.75 each

Other Varieties Available

Page 31 of Berry's catalog lists many other shade trees such as Crimson King Maple, Pin Oak, Maroon Locust, American and Chinese Elm, Silver Maple, Nioe Weeping Willow, Lombardy Poplar, Hornbeam, and the smaller size evergreens. Also on page 33 plants for vines and hedges as well as small fruit.

Other FRUIT TREES

Dwarf Rich Sour Cherries: Grows only 5-6 feet tall. Trees often bear the second year after planting. 18 to 24 inch size 6/16 inch diam. No. 6376 **\$2.65** each.

Dwarf Alberta Peach: Same as the regular Alberta freestone but a low growing tree. Deep golden skin, fine flesh. No. 6440, **\$2.65** each.

Dwarf Polly Peach: A fine white freestone peach. Large fruit. No. 6441 **\$2.65** each. **Max-Red Bartlett Pear:** New bright red very delicious. 4 to 5 foot **\$2.75** each. No. 6200.

Dwarf Max-Red Bartlett Pear: Same as the above but dwarf size trees. No. 6220. **\$3.60** each.

Other pear trees as low as \$1.40 each. See page 35 of Berry's catalog. Bartlett, Douglas, Kieffer and Parker.

Peach Trees

As low as 60c each. These are also described on page 35 of the Berry catalog.

6402 Early Elberta 6405 Golden 6407 J. H. Hale
6403 Elberta 6406 Golden 6408 Red Haven
6406 Hale Haven 6415 Red Haven

See page 35 of Berry catalog for the exact prices on the different varieties and sizes. Be sure to refer to our Berry catalog. Catalog service is available in all retail stores.

Strawberry Plants. These are available through mail order. See page 30 of Berry's general catalog. Write us for a copy if you do not have one. Or consult your nearest Berry's retail store. 17 varieties available and all very reasonably priced.

Heavy Seed Oats and other Grains

New Clarion Oat

We believe that this is the greatest oat that has come along since the Clintons were introduced back in 1946. They resemble Clinton in their heavy yield and stiff straw. They are superior to it in their resistance to stem rust and other diseases. It has performed well in all areas. It is a good seed and will last. It is a good seed and will last.

Golden Beauty Brand of Clarion Oats

The new Clarion variety is especially described in the opposite column. All of the oats that we offer you whether certified or not certified, are the special heavy grading which makes them stand out above all other seed. The Golden Beauty Brand however stands out over and above even the regular Blue Seal Processed. They come in retaining perfection as any on that can be bought anywhere. This extremely heavy grade is extremely strong plants and the yielding record has exceeded that of any other variety or grade. We will guarantee our Golden Beauty Brand of Clarion to outyield any other Clarion that you may buy including Certified Clarion. If they do not do that we will refund you any extra costs that you may have in the Golden Beauty Brand. If you like the very best and the very finest order this brand. See Item 174 on the price list.

Missouri 0-205

While not as nice a looking oat as some of these others, for actual performance they have out performed many of them. For Southern Iowa and Missouri areas we do not think that there is a better oat that you can choose. Very long thin hull, unusually large growth, very high feeding value. Excellent disease resistant quality. Certified seed item 165; Extra Fancy non Certified item number 164.

Certified Nemaha

This also is a reselection from the original variety. These are very much like the Cherokee Grade is wonderful quality, they look like heavy Canadian Oats, they are far superior for corn belt because they mature early and fill better. Medium thin hulled; has good disease resistant characteristics. See page 20 and 21 of our catalog. Certified seed see Item number 168; non Certified extra fancy see item number 169.

Certified Clintland

Similar to the old Clinton excepting it has resistance to all crown rust; moderate resistant to Black-More rust. A tall straw producing oat. Right up at the top in Iowa; giving splendid performance in Nebraska, Illinois, Ohio and Indiana. Blue Seal Processed. Very heavy test weight 42 to 44 lb. They are tremendously productive. See Item 167. Read about Blue Seal Processed on pages 20 and 21 of our catalog.

Reselect Cherokee

This is a wonderful variety that has been carefully resellected to give a higher varietal purity and more uniformity. The grade has a pinkish ivory color; heavy test weight; is early in maturity and that is a big advantage in many ways. It has moderate tolerance to race 45 crown rust, resistance to race 8, somewhat susceptible to race 7 and to black-more rust. You almost have to see these oats to appreciate their wonderful quality and character. They are Blue Seal Processed and you get these oats at their very best. Certified Item number 170; non Certified item number 171.

Spring Speltz

Spring Speltz is a highly drought resistant and a very unusual grain. The shuck carries two seeds which are a little softer than most wheat. Makes wonderful ground feed and yields well under dry conditions but not recommended for humid conditions. It is a bearded grain, sown at the rate of about 2½ bushels to the acre early in the spring. Grown more in the west. Under dry conditions have had some splendid reports of yields. See page 20 of item 202 on the price list.

SPRING BARLEY

KINDRED OR L BARLEY

This is one of the best malting types and seems to be the No. 1 choice of the majority of maltsters and brewers. Has given very satisfactory results under quite a variety of conditions. The straw is not as strong as some other varieties but that seems to be its only weakness. In other characteristics it apparently has considerable superiority. Sow spring barley early at the rate of around 2 bushel to the acre. Item No. 191 on the price list.

MONTCALM BARLEY

This is an old favorite, six rowed, smooth awned. Straw grows erect fairly tall, grain of medium maturity, has relatively high resistance against a number of diseases. It is an accepted malting variety. Many farmers like Barley as a nurse crop as well as a grain crop. Come in and talk to us about spring Barley. See item No. 190 on price list for quotations.

Certified Sauk Oats

This is a Wisconsin origin. They are moderately late in maturing. They are quite similar to the Branch oats. Very resistant to rust and will be recommended to most oat producing states this year. Medium tall straw and of course Blue Seal processed with Gro-Coat protection like all of our oats. Considering performance you will find them very economical. See item number 162.

Spring Wheat

Henry

One of the heaviest yielding spring varieties. Does not stand as good a flour as the Lee Wheat but if you are looking for big yields of high feeding quality, you will like this variety. Spring Wheat of course should be sown real early for best results. Sow a bushel and a half to the acre. See item No. 199 on the price list.

Lee Wheat

A splendid milling variety, medium early maturity, bearded grain, high yielding variety that stands up well, fine quality Northern seed. See item 198 on the price list.

Quick Growing Annual Crops

Sweet Sudan Grass

You may be needing a crop that will produce a large amount of high quality hay or pasture quickly this year. Sweet Sudan is delicious and nutritious and enormously productive. Livestock are very fond of it because of its sweet taste. Let us tell you all about this wonderful crop. Item No. 231 on the price list.

Dwarf Essex Rape

A fast growing crop. Can be sown early at seedling time, or shortly after and pastured in 6 to 8 weeks after seedling. Especially fine for hog pasture. Has fine, leafy, coarse leaves but does not head. Requires only 4 to 5 pounds per acre. See item No. 233.

Atlas Sorgo

A tall growing Sweet Sashed Sorgo. It is a fast growing and livestock is very fond of it. It stands extreme drought, far more than corn. Plant in rows, cultivate like corn, feed it out of the shock. Good for silage. Item No. 220.

Millets

We carry the German or Golden Millet. It is a tall growing crop in a heavy soil. Will make a hay crop in 60 to 65 days. Not recommended for pasture. Item No. 225. We also have several of Hog Millet which is early maturing and larger seeds. Used for poultry feed but not so good for hay. Item No. 227.

Certified Piper Sudan

A fast grower adapted to cooler climates. Developed in Wisconsin. Many farmers prefer it over all others. Resists foliage diseases better than common. Stays green longer. It is lower in prussic acid than other sudan. Plants have strong seedling vigor and get off to a quick start. Sudan and all similar crops are going to be in big demand. Get your order in now. See item 229.

Billion Dollar Grass

A tall growing variety of millet. Does best on land of good fertility and not too dry. Will stand cooler growing conditions than Sudan but does not want to be planted until soil is cool planting time. Tremendously productive on good soil. See item No. 232 on the price list.

Norgrum

This is a low growing grain sorghum originated in South Dakota. Under the conditions there, the plants grew 35 to 40 inches tall and produced 100 bushel per acre. Very popular for early feed wherever early maturity is desired. Drill around 8 to 10 pounds per acre. Item No. 219.

Cane

We carry the sweet stalk cane that must be cut and fed. Some is fed as hay and much more for silage. It is the same cane used for molasses, but it may contain a few other strains so we do not know exactly what it is. It is a good feed. Rates of seeding vary according to spacing of rows. See items 214 and 215.

SOY BEANS

Hawkeye

A splendid grain crop bean in areas like Northern Iowa, Southern Michigan, St. Louis and St. Paul. Stalks are strong and pods are mostly 3 seeded. Good length straw is lodging resistant. Used farther south for delayed planting. Item No. 164 and 185.

Harosoy

A very early variety about 15 earlier than Lincoln. An excellent main crop for areas like Northern Iowa, Northern Illinois, etc. Planted furthest north where early maturity is desired, where late planting is practiced. See item 181C and 181M.

Lincoln

About a week later than the Hawkeye. A very high yielding bean. It and the Adams are very similar. Needs its beans well for combination. Excellent beans of Illinois, Ohio and Indiana conditions. See items number 181 and 182.

Common Sudan

Common Sudan is the kind with which most farmers are familiar. Provides two to three cuttings of hay. Sow when ground is warm. Use about 20 pounds per acre. The heavier the seeding the finer the growth.

Redbine 60 Milo

A short growing, drought resistant grain that will yield almost as much as corn on average land. Grows in a heavy soil when matured. Is very palatable. Plants 10 pounds per acre. See page 23 of the catalog for further description. Item number 222 on the price list.

Haybean

We have only a very limited supply of these beans. They are finer sized than grain varieties and therefore when wanted for hay they are often chosen. These grain varieties can also be used for hay if cut before the beans are too well formed. We generally have the Kingwa or Black bean. See item 188.

Clark

See page 14 of our catalog for more detailed description of Soybeans. Clark is an excellent variety. Grows like the southern third of Iowa and on south. It will outyield Adams, Lincoln and Chief but is about same height. Beans are about three times larger than Chief, about 3 days later than Lincoln. This is a splendid bean. 180CE and 180NO.

Adams

A good tall straw. Perhaps even more lodging resistant than Lincoln. Might mature a couple of days earlier. Our tests the Adams are superior over the Lincoln and in other tests the reverse has been true. See item 188.

Blackhawk

One of our earliest soybeans. Is used areas like Northern Iowa, Southern Illinois, etc. Planted furthest north where about two weeks earlier than Lincoln. Stands well, yields are high. Item No. 183.

Berry's Top Yielding Corn

Fine Gro-Coated Seed Stock

See pages 18 and 19 of catalog for full description of all varieties.

Stiff stalks, 85 to 95 day type. Our earliest variety. Resistance dark green foliage, medium ear length and depth of kernel.

405-B to 105 day type. Makes a splendid early growth. Kernels of good depth and ear size very satisfactory for a corn of this maturity. Good for early fall harvesting varieties.

405-B to 95 day type. Adapted to early maturity. Grown for northern states where early maturity is desired. Grown further south as an early feeding corn. Strong, sturdy, broad leaf plants. Good ears.

615-B, 105 to 110 day corn. One of the very best for thinner soils. Also responds well to irrigation. An excellent yielding variety. Kernels have a light reddish cast on the ears. Strong stalks and shanks.

705-B to 110 day variety. Has stood up under wind conditions that has practically leveled neighboring fields. Holds its ears when there is a high wind. Very good for early fall harvesting. Drought resistant. Deep grains, heavy shelling percentage. One of the very best in its maturity.

650-105 to 113 day type. A new hybrid that has proven in Illinois and Ohio trials to be excellent tolerance to corn borer, good grain, strong stalk. Resistance to chinch bugs and tolerance to corn borer. This is a good ear for fall harvesting. Very good for early fall harvesting.

813-120 day type. Has been our heaviest yielder. Contains an extra infrared line. Proven in the most northern states for good grain, strong stalk. Resistance to chinch bugs and tolerance to corn borer. This is a good ear for fall harvesting.

800-B to 110 day type. One of our newest developments. Thoroughly tested. One of the finest hybrids that we have ever produced. Ears good for machine or hand picking.

813-120 day type. Has been our heaviest yielder. Contains an extra infrared line. Proven in the most northern states for good grain, strong stalk. Resistance to chinch bugs and tolerance to corn borer. This is a good ear for fall harvesting.

Berry's Hybrid Blend

A combination of hybrids from our regular production designed to give longer pollinating period, greater assurance of well filled ears, and strong hybrid vigor. These have been very popular and our prices on them are very low. They are carried in two maturity ranges, the medium which contains varieties that range from 95 to 110 days in maturity and the late which is made up of varieties 105 to 120 day varieties. These are available in different grades. Medium comes in Small Flats which are shorter grains. Thick Flats which are kernels too long for rounds and too thick for flats. Rounds which are carefully prepared round grades. Rounds are available in same grades and also in Regular Flats. See price list for very low prices ranging from \$6.25 per bushel up.
